

Figure 1 is a line graph showing the dependence of the relative error δ on the number of nodes n . The x-axis represents n from 0 to 10, and the y-axis represents δ from 0 to 1.0. Three curves are plotted: a solid line, a dashed line, and a dotted line. The solid line starts at $(0, 0.17)$ and increases to $(10, 0.20)$. The dashed line starts at $(0, 0.17)$ and increases to $(10, 0.10)$. The dotted line starts at $(0, 0.17)$ and increases to $(10, 0.09)$.
